GROUP 457th Sqdn. 751st A/C No. 43-38561

MISSION DATE 2 November 1944 FIRST PILOT Bruce F. Harrison
(Name)

2nd Lt. (Rank) O-825856 (Serial No.) DESTINATION Merseburg

1. Position of missing aircraft when last sighted or contacted:

(a) By coordinates Approximately 5135-1125 to 5110-1110

(b) Approximate altitude Unknown

(c) Last noted heading Unknown

(d) If out of formation, approximate distance from formation Unknown

2. Describe enemy opposition (intensity of flak, intensity and method of enemy fighter attack, etc., with particular reference to missing A/C):

Approximately 40 enemy aircraft bounced group at about 1248 to 1258, 17 to 27 minutes after bombs away, in area between coordinates. They attacked from the tail between 5 and 8 o'clock. They came in in waves, but each of them appeared to single out an individual B-17 to attack.

3. Description of extent of damage to missing aircraft (including fires, explosions, etc):

No description.

4. If aircraft was out of control describe appearance:

An aircraft which one witness "thought was 561" was seen going down in a spiral.

(Over)

C O N F I D E N T I A L

Ltr. #161

5. If distressed aircraft was out of formation, was it last seen with escort? No If so, give distinguishing markings of Fighter Group if noted (Group number, color and/or fighter aircraft numbers, nicknames, etc.): _____

_____

6. Number of parachutes seen and description of jumps (approximate altitude, time between jumps, etc.):

None seen.

7. Any other remarks not covered by above: Aircraft was flying number six, low section, low squadron. This was one of seven aircraft shot down from this squadron. There was also one aircraft shot down from each of the lead and high squadrons. The squadrons were flying in group formation. The confusion caused by the attack makes the accuracy of the reports doubtful. There were a number of reports from crew members about ~~8 of 10~~ unidentified B-17's going down, with engines, wings, or tails on fire; about unidentified parachutes being seen, and about unidentified aircraft blowing up; and one or 2 reports about unidentified aircraft colliding. A/C 43-38561 was not identified in any eye-witness report.

8. Date of report 12 Nov. 1944

INDIVIDUAL CASUALTY QUESTIONNAIRE File-f 10321

Name of crew member: GORDON Charles I.
Rank: Sgt.
Serial number: 39140386
Position: Crew (Bomber) of [redacted]: Waist Gunner

Did he bail out? Yes

Where? Near Kolleda, Germany (About 30 miles south of Merseburg, 20 miles east of Sommerda)

If not, why not?

Last contact or conversation just prior to or at time of loss of plane: Can't remember; nothing of importance, at any rate.

Was he injured? Yes, mortally, in the neck.

Where was he when last seen? In a field near Kolleda

Any hearsay information: It's all hearsay. I didn't see Gordon at all after we were hit. He died in a field about a half hour after we were shot down, which would be about 1315.

Source: 2nd Lt. Robert C. McGuire, copilot. 232 Vann St. Syracuse, N.Y.

Any explanation of his fate based in part or wholly on supposition:

Total number of missions of above crew member: four

Dates and destinations if possible: 19 Oct 44 Mannheim; 22 Oct 44 Hanover; 25 Oct 44 Hamburg; 2 Nov 44 Merseburg. (Approximate)

6-3861, AF

Sgt. Gordon was unconscious when Sgt. Robert Rhyner hooked him to the static line and bailed him out. Sgt. Rhyner also aided the radioman, Sgt. Silverstein, who was wounded, to bail out. To do this he had to go from the flight deck to the waist through a burning radio room. He left his own parachute for me to use, because he knew mine had been shredded by a bullet. He used the spare chute in the waist. I think Sgt. Rhyner deserves at least a D.F.C. for this.

AFPPA-11

INDIVIDUAL CASUALTY QUESTIONNAIRE File-# 10321

Name of crew member: CERRONE Anthony T.
Rank: Sgt
Serial number: 32807730
Position: Crew (Bomber) ~~////////////////~~: Ball Turret Gunner

Did he bail out? Don't Know; probably did; no trace of him in wrecked plane.

Where? Somewhere between Merseburg and Kolleda, if he did.

If not, why not? Didn't know much about the ball turret; a substitute.

Last contact or conversation just prior to or at time of loss of plane: @ 1235, oxygen check; complained of cold; having trouble with Sperry sight.

Was he injured? Don't Know; no blood in turret, but some bulletholes in glass.

Where was he when last seen? In the turret.

Any hearsay information: Plane was searched next day by 3 crew members, but no sign of Cerrone. Turret in fairly good shape, with bulletholes in glass. No blood, hair, or clothing. Impossible to tell whether turret door had been opened inside or outside the ship. Sgt. Youngross, first one out, counted only six parachutes.

Source: 2nd Lt. McGuire, Lt R.F. Harrison, Milan, Tenn; Sgt R. Rhyner

Any explanation of his fate based in part or wholly on supposition: Chute may not have opened: May have left turret from outside ship without chute due to the heat on the turret by fire in the radio room.

Total number of missions of above crew member: four, I think.

Dates and destinations if possible: Same as for Gordon, approximately.
